# OUR PROJECT

## NESTNOW

This project is aimed at developing a web based Real Estate platform for Buying and Selling. Nest Now is an Internet based application. This system can be used to store and search the property portfolios.

Nestnow is a unique virtual platform that allows any user to post a property related ads( for selling) on the Nestnow site without incurring costly advertisement fees. User friendliness, reliable service together with maximum and continuous exposure is the qualities that NestNow stands for. We believe that whether you are searching or selling your property online, a pleasant and hassle free experience is of utmost importance.

# OUR PROJECT

---

The current Real estate system is a manual operated system, owners need to advertise their properties in local channels and news papers. In the existing system property information can be spread into limited users only. And There is no concept of 24 X 7 mode. The current system is a manual one where users have to pay lot to get their property advertised in news paper, or get printed. Drafting letters and advertisements will take time.

Manually approaching the person and confirming the availability of the person do selection of a person for a advertisement. Even if you advertise there is less reach to your ads as you tend to advertise in the local or city news paper.

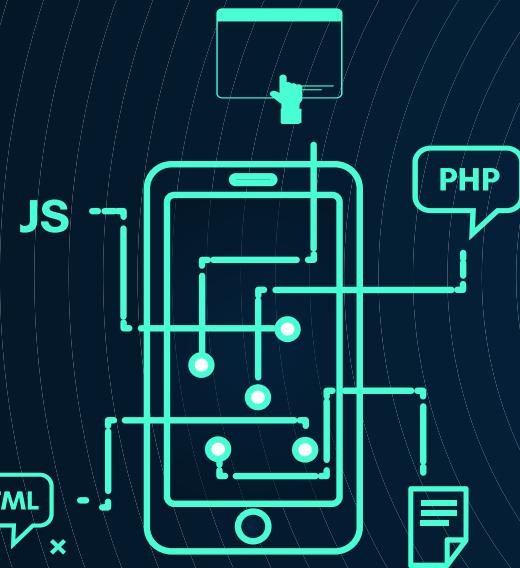

# OUR PROJECT

---

To over come the above cons we have developed Nestnow Real estate Management. The information of the entire firm will be maintained at a centralized data base . Provide Interactive interface through which a user can interact with different areas of application easily. People can list their property for free without any advertisement fee and can have reach of their listings globally, that too 24/7, Solving the issues of cost and reach of property listing

# DESIGN

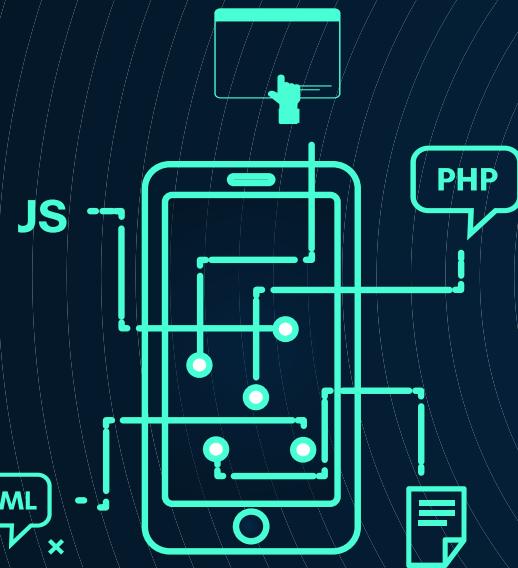

## Technologies Used:

1. HTML: Hypertext Markup Language is the standard markup language for documents designed to be displayed in a web browser. It can be assisted by technologies such as Cascading Style Sheets and scripting languages such as JavaScript. Web browsers receive HTML documents from a web server or from local storage and render the documents into multimedia web pages
2. SQL: SQL is a standard language for storing, manipulating and retrieving data in databases.

# DESIGN

## Technologies Used:

3. PHP: PHP is a server side scripting language that is embedded in HTML. It is used to manage dynamic content, databases, session tracking, even build entire e-commerce sites. It is integrated with a number of popular databases, including MySQL, PostgreSQL, Oracle, Sybase, Informix, and Microsoft SQL Server.
  
4. JavaScript: JavaScript is a light-weight object-oriented programming language which is used by several websites for scripting the webpages. It is an interpreted, full-fledged programming language that enables dynamic interactivity on websites when applied to an HTML document.

# MODULES

“NEST NOW Real Estate Management” contains Three main modules based on user base, which are visitor, Admin, Customer.

## VISITOR

Every person visiting site will be directed to the main home page. Users can search for properties and give feedback being a visitor

## CUSTOMER

New users can register and login through the login panel. Once logged in, the customer will be re directed to customer dashboard where he can enter his property details and list his property

## ADMIN

Admin has to login with admin credentials. Admin has the options of adding new cities and areas, modifying username and passwords, creating news and updates, Read feedback and managing states.

# FLOWCHARTS

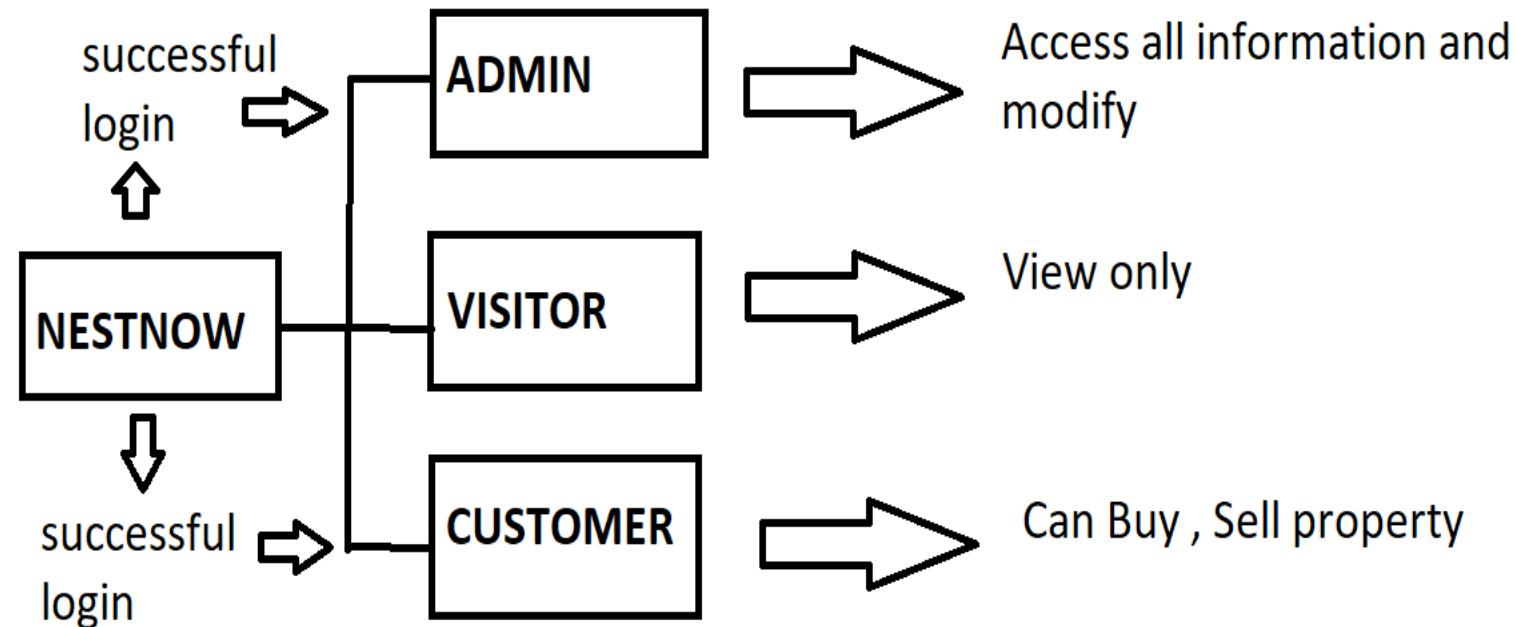

Fig: flow of user

# DESIGN OF NESTNOW WEB PAGE

# PSEUDOCODE

---

## Login:

visitor landing on index page:

```
if (new user)
    register
else
    login
```

Login: (customer)

```
if (username and password matches)
    redirect to customer dashboard
else
    display error "Username or
password incorrect"
```

Login: (admin)

```
if (username and password matches)
    redirect to admin dashboard
else
    display error "Username or
password incorrect"
```

# PSEUDOCODE

---

## **Customer profile:**

Display all info of customer in session

```
(select * from customer where customer_ID=$Session(Customer_ID));
```

If click on "Edit profile"

    Open editable text fields of profile

after altering profile details

if click on "update profile"

```
    alter table customer_id= $session(customer_id);
```

## PSEUDOCODE

---

**upload property**

display all fields of property. Let user  
fill the fields

select "residential" or "commercial"  
and

select "state" of the location of  
property

and

select "city" of property  
and

select "area" of the property  
and

enter the property name in the name  
field

and

enter description of the property  
and

browse and select the property images  
and

enter "total area" in the area field  
and

select the age of the property from  
drop down

and

select no. of rooms in the property  
and

enter the cost of the property

when user click "upload" retrieve data  
from form to database to the table  
property\_master.

Show pop up "new property inserted  
successfully"

# PSEUDOCODE

---

*algorithm:*

Search property

searches the database for

property type and state and city and area

if all 4 parameters are met, it displays the property or properties.

## Testcases

# TESTING

TC-001	Log-in Page	Leave all fields as blank and click Log-in button	Click Submit		By leaving all fields as blank and on click Log-in button then mandatory symbol ( * ) will appear in front of Username and Password fields
TC-002	Username	Entering Invalid Username or password	Click Submit	Username :hari1xc f .....	By entering invalid Username then an error message should appear as " Please Enter Valid Username and password"
TC-003	Log-in button	Correct Inputs	Click Submit		It will lead the user to the respect page
TC-004	Registration		Click Registration		On click " Registration " page should redirect to the User Registration page
TC-005	Register page- Customer name	Leaving the customer name Field blank	Click Submit		On click "Submit" There is a pop up shown Please Enter valid Name

## Testcases

# TESTING

TC-006	Register page-Address	Leaving the Address Field blank	Click Submit		On click "Submit" There is a pop up shown Please Enter Address
TC-007	Register page-Mobile Number	Leaving the Mobile Number Field blank	Click Submit		On click "Submit" There is a pop up shown Please Enter valid Mobile Number and Displaying current length of of mobile no.
TC-008	Register page-Mobile Number	Entering invalid characters	Click Submit	34drf4f	On click "Submit" There is a pop up shown Please Enter valid Mobile Number
TC-009	Register page-Mobile Number	Entering less length numbers(less than 10)	Click Submit	12345678	On click "Submit" There is a pop up shown Please Enter valid Mobile Number showing the current length entered
TC-010	Register page-Email ID	Leaving the Email ID Field blank	Click Submit		On click "Submit" There is a pop up shown Please Enter Email ID

## Testcases

# TESTING

TC-011	Register page-Email ID	Entering invalid format of email ID	Click Submit	Ferferf.com	On click "Submit" There is a pop up shown Please Enter valid Email ID
TC-012	Register page-DOB	Leaving the DOB Field blank	Click Submit		On click "Submit" There is a pop up shown Please select Birthdate
TC-013	Register page-User name	Leaving the user name Field blank	Click Submit		On click "Submit" There is a pop up shown Please enter user name
TC-014	Register page-password	Leaving the password Field blank	Click Submit		On click "Submit" There is a pop up shown Please enter password
TC-015	Register page-all fields	Entering all fields correctly	Click Submit		On click "Submit" There is a pop up shown "Thanks for registration"

## Testcases

# TESTING

TC-016	Buy page-Search property	Leaving all fields unselected	Click Search		On click "Search" There is property shown which matches the selected fields, since no field is selected , the result is 0 property found.
TC-017	Buy page-Search property	Selecting only state field and leaving unselected city and area	Click Search		On click "Search" There is property shown which matches the selected fields, since the search requires all fields to search and display property, message shown "0 property found"
TC-018	Buy page-Search property	Selecting all fields (state, city, area)	Click Search	State: Karnataka City: Bangalore Area: E-city	On click "Search" There is property shown which matches the selected fields.
TC-019	Sell page-Listing property	Leaving all fields empty	Click Upload		On click "Upload" There are errors shown, the fields unfilled are marked in red indicating important.
TC-020	Sell page-Listing property	Filling all fields with valid data	Click Upload		On click "Upload" There is pop up shown successful.

## Testcases

# TESTING

TC-021	Image and docs	Not selecting or uploading	Click Submit		On click "Submit", there is error saying this value is required with field with red color
TC-022	Admin-News Management	Leaving the news and date field empty	Click Submit		On click "Submit" there is error displayed value is required
TC-023	Admin-News Management	Filling both fields	Click Submit		On click "Submit" there is pop up saying "New News Inserted Successfully"
TC-024	Admin- Area Management	Selecting city and leaving area name blank	Click Submit		On click "Submit" there is error saying value is required
TC-025	Admin- Area Management	Selecting city and entering area name blank	Click Submit		On click "Submit" there is pop up "area inserted successfully"

# CONCLUSION

We have developed a real estate system that serve the real estate customers and give them a transparent prices of properties sold by other customers. It gives them a historical information about the property listed that may solve one of big problems of real estates. The system focuses on main operation like sale and buy operation of real estate.

# FUTURE ENHANCEMENTS

## FINANCIAL MODULE

We would like to add a payment gateway for paying the seller advance amount and secure the property for buying

## USER EXPERIENCE

We would like to improve the user experience of nestnow website as well as the overall process of buying and selling real estate

## AUCTION

Adding a action based system for in demand properties lets maximum benefit for both buyer and seller

# THANKS!
